<b>Chapter 6 Use of State Vehicles Policy</b>		
<b>DNR Vehicle Inspection Procedures</b>	<b>Effective date</b>	<b>Revised</b>
<b>Number: 6.01-03</b>	<b>December 21, 2005</b>	

## REFERENCES

Vehicle Equipment Regulations Chapter 307 RSMo 307.350 – 307.395 concerning inspections

Air Conservation Chapter 643 RSMo 643.315 – 643.355 concerning inspections

## GENERAL PROVISIONS

State safety inspections for vehicles are valid for two years, with even model year vehicles inspected in even years and odd model year vehicles in odd years. License transfers may result in the need for out-of-cycle inspections.

Special emissions inspections/tests prescribed by statute for specific locales are also required. The Gateway Clean Air Program for the St Louis metropolitan area mandates emissions tests for vehicles every two years on an even model year – even testing year, odd model year – odd testing year cycle similar to safety inspections. New vehicles which have not been previously titled and licensed are granted an exception for the two year period following their model year of manufacture (e.g., the first inspection required for a model year 2000 vehicle would be in 2002, unless a license transfer or similar action occurs).

Safety and emissions inspections/tests will be recorded in the State Fleet System.
